

Specification

Copy the program [MyLinkedList.java](#) and implement methods that have "TBI (To Be Implemented)" in their respective method comment blocks. For one method the TBI is to write the method comment block.

The output of your program must match the following. The already coded main() method should not need any modifications. [{output file}](#)

```
test remove()...
linked-list: [ 0 1 2 3 4 1 ]
remove(1): T; [ 0 2 3 4 1 ]
remove(0): T; [ 2 3 4 1 ]
remove(1): T; [ 2 3 4 ]
remove(4): T; [ 2 3 ]
remove(2): T; [ 3 ]
remove(3): T; [ ]
remove(2): F; [ ]

test insert()...
linked-list: [ 0 1 2 3 4 1 ]
insert(9, 2): T; [ 0 9 1 2 3 4 1 ]
insert(8, 0): F; [ 0 9 1 2 3 4 1 ]
insert(5, 9): F; [ 0 9 1 2 3 4 1 ]
insert(6, 7): T; [ 0 9 1 2 3 4 6 1 ]
remove(9): T; [ 0 1 2 3 4 6 1 ]
remove(6): T; [ 0 1 2 3 4 1 ]
```
